Attn: Mr. Gary Miller

Re: Exceptional Supplier Service

Gary, just a note to say thank you for all the exceptional work Miltech has done in the past for the Delta Z GMX357 program.

As you are well aware, we had some very tight timing for the three different types of harnesses required for GM.

We gave you a large list of components needed in a very short time for our mule builds and Miltech proved themselves by not only meeting our timing, but also taking care of the appropriate paperwork needed for GM. We especially appreciate the personal delivery service due to tight timing. When GM sprung an additional 6 pc requirement on us, you came through again with flying colors!

Again, if future projects come up, I will not hesitate to call Miltech, and I will always recommend you to anyone looking for similar work.

Regards,

Jean Lahr
